

HYGIEIA is developing solutions for infectious disease problems facing the aquaculture industry.

Can you use a cost effective custom vaccine product?

Is your existing vaccine working as well as you need it to?

Are you struggling with a disease problem that others can't solve?

LET'S TALK.

HYGIEIA
Biological Laboratories

**Aquaculture
Vaccines**

WHY HYGIEIA?

WE DO THINGS THAT OTHERS CAN'T

- Novel products developed for multiple species
- Proprietary formulations reduce adverse events
- Hygieia vaccines typically perform better because we have the experience and resources to get the job done
- Largest independent vaccine company serving aquaculture in North America
- Manufacturing licensed autogenous vaccines since 1991
- Dedicated aquaculture vaccine research facilities and staff

HYGIEIA products are distributed by some of the largest pharmaceutical firms in the world. The creativity and quality these companies seek is now available directly to **you.**
